

STF3-New architecture for AI-generated video detection

A modernized STF3 pipeline: DINOv2 spatial semantics, D3/ReStraV temporal dynamics, wavelet-spectral frequency traces, and branch-token fusion

Compared with the old STF3-Lite diagram, ResNet18, pixel difference, SmallCNN and FFT-only modules are replaced by foundation embeddings, D3/ReStraV dynamics, WaveRep-style wavelet-spectral statistics and branch-token fusion.
